

GAF TPO Plant New Columbia, PA

New Columbia is the latest addition to the more than \$2 billion invested by GAF in the roofing industry over the last 10 year. GAF is North America's largest roofing manufacturer.

This location focuses on supporting the production of high quality commercial thermoplastic polyolefin (TPO) roofing materials and plastic injection molded accessories.

S.P. McCarl installed the (HVAC) heating, ventilation and Air conditioning as well as humidity control for TPO production, production equipment exhausting systems and raw material storage, conveying equipment and conveying piping systems. The project had an aggressive six month schedule to install over 6,000 ft of process piping, compressed air systems, chillers, cooling towers, packaged rooftop units, makeup air units and more.
