

Huntingdon School District ESCO Project

Burke & Company, LLC dba S.P. McCarl & Company partnered with another Pennsylvania mechanical contracting firm on the Huntingdon School District energy-savings project. Our scope of work was performed at Standing Stone Elementary. This project was fast-paced with a strict deadline, and we met the challenge. Our pipe prefabrication shop was integral in the planning and execution of our project timeline to ensure the school was ready for the students to return in the Fall.

Project Details

- Removed all existing hot-water units for each classroom and installed new water-cooled unit ventilators
- Demolished air-cooled chiller and installed new outdoor fluid cooler
- Replaced base-mounted pumps in mechanical room
- Demolished existing AHU's and installed new RTU's
- Prefabricated all pipe for the mechanical room to ensure work would get completed on-time
- Communicated and collaborated between all trade partners to meet project deadline

Other ESCO Projects

- Williamsburg School District
- Altoona Water Authority
- SCI Cresson
- SCI Smithfield
- SCI Laurel Highlands
- Ebensburg Center
